Executive Order #012

I create the Department of Science and Technology. Its purpose shall be to promote and sponsor the development and study of science and technology in the Empire, to aid in the dissemination of the knowledge thereof, and, with the Department of Defense, to guard any such technology that has been deemed by the federal government to be vital to the security of the Empire. I appoint Joel Orge as Secretary of Science and Technology.

Corey I  
Emperor of Diking
